Dear Valley Water Board of Directors,

Protecting California's rivers and the Delta is a top priority for me!

Dear Chair Estremera and the Board of Directors,

I am writing to urge Valley Water not to allocate any additional funds to the proposed Delta Conveyance Project and vote no on Agenda Item 3.5.

The Delta tunnel project is a proposal to construct a single underground tunnel to divert millions of acre-feet of freshwater that would otherwise flow naturally through the Bay-Delta, diverting up to 6,000 cubic feet per second (cfs) from the Sacramento River without preserving sufficient flows for salmon species and Delta smelt.

For years, the Bay-Delta ecosystem has been severely depleted of its essential freshwater flows, causing the destruction of natural habitat for endemic species and worsening the livelihood of residents in Delta communities. This project will absolutely hasten the decline of the Delta.

Ratepayers will face increased water bills and property taxes, with no assurance of a sustainable water supply if Valley Water continues to spend millions of dollars - nearly \$650 million by the final construction vote - on this project! Remember that the board is ultimately accountable to their ratepayers who do not want their bills to rise amid an era of constant inflation and an affordability crisis.

The Delta tunnel project is an expensive and environmentally harmful project - failing to ensure new water resources in a time of climate change. Valley Water must prioritize limited public funds for projects that will deliver tangible improvements in water security and the overall health of the Delta.

I urge you to make a responsible and informed decision by rejecting this funding, and voting NO on Agenda Item 3.5.

Sincerely,

Sincerely,

Heinrich Albert

Dear Valley Water Board of Directors,

VOTE NO ON THE DELTA TUNNEL!!!!!! The Delta Tunnel will reduce water flows and devastate the already-fragile San Francisco Bay Delta ecosystem. The tunnel will hurt salmon and other fish, bird and wildlife populations, and reduce the food source to whales and other marine mammals in the Pacific Ocean. It will devastate the Stockton area's air quality and already depressed local economy. It will also hurt the cultural livelihood of Indigenous communities in Northern California. Not to mention every every living thing in the state of California.

Dear Chair Estremera and the Board of Directors,

I am writing to urge Valley Water not to allocate any additional funds to the proposed Delta Conveyance Project and vote no on Agenda Item 3.5.

The Delta tunnel project is a proposal to construct a single underground tunnel to divert millions of acre-feet of freshwater that would otherwise flow naturally through the Bay-Delta, diverting up to 6,000 cubic feet per second (cfs) from the Sacramento River without preserving sufficient flows for salmon species and Delta smelt.

Dear Valley Water Board of Directors,

At this point in time, with the wildfires when many Angelenos are finding themselves impacted financially, spending rate payers money to prop up a failing system is irresponsible. I live in Los Angeles and had to evacuate on Tuesday from the Palisades fire. Everything on the street, every home burnt down. Do you think as a rate payer, facing insurmountable financial hardship in the near future, that asking us to pay for a project that was voted down in the 80's is just or fair?

This will provide no new water, and as this disaster has shown, locally sourced water is best, because there would be no disruptions or very limited disruptions of service. Please vote no and use the money to improve local infrastructure bringing it up to code and seismic standards.

Dear Chair Estremera and the Board of Directors,

I am writing to urge Valley Water not to allocate any additional funds to the proposed Delta Conveyance Project and vote no on Agenda Item 3.5.

Dear Valley Water Board of Directors,

The Delta Tunnel project is estimated to cost \$20.1 billion, before inflation and overages. Valley Water ratepayers will pay a major part of this. All funds would be better spent on local projects. Not a single Tribe consulted supports this project. Why waste money planning and building it when we could instead look for more sustainable and reliable regional and local solutions?? It's really time to think out of the box. Environmental justice advocates emphasize the need for bottom-up approaches that engage local communities in creating sustainable, equitable, and resilient local water management systems. Listen to First Nation voices and consider Traditional Ecological Knowledge, or TEK, regarding land and water management, honed through generations.

Dear Chair Estremera and the Board of Directors,

I am writing to urge Valley Water not to allocate any additional funds to the proposed Delta Conveyance Project and vote no on Agenda Item 3.5.

The Delta tunnel project is a proposal to construct a single underground tunnel to divert millions of acre-feet of freshwater that would otherwise flow naturally through the Bay-Delta, diverting up to 6,000 cubic feet per second (cfs) from the Sacramento River without preserving sufficient flows for salmon species and Delta smelt.

Dear Valley Water Board of Directors,

This tunnel will disrupt our environment, and does no good for us. Los Angeles does not use our water wisely as witness these fires and the haphazard response. There are gas wells under the surface of the Delta that will be affected by this project and possibly ignite to cause a catastrophe. I don't want to pay for people in Orange County to hose off their driveways while we are drastically curbing our water usage. This is a boondoggle to squeeze more money out of California citizens. With the climate change happening, L.A. may revert to the desert it was when the Spanish arrived. Stop pimping our water!

Dear Chair Estremera and the Board of Directors,

I am writing to urge Valley Water not to allocate any additional funds to the proposed Delta Conveyance Project and vote no on Agenda Item 3.5.

Dear Valley Water Board of Directors,

Dear Chair Estremera and the Board of Directors,

I am writing to urge Valley Water not to allocate any additional funds to the proposed Delta Conveyance Project and vote no on Agenda Item 3.5.

The Delta tunnel project is a proposal to construct a single underground tunnel to divert millions of acre-feet of freshwater that would otherwise flow naturally through the Bay-Delta, diverting up to 6,000 cubic feet per second (cfs) from the Sacramento River without preserving sufficient flows for salmon species and Delta smelt.

For years, the Bay-Delta ecosystem has been severely depleted of its essential freshwater flows, causing the destruction of natural habitat for endemic species and worsening the livelihood of residents in Delta communities. This project will absolutely hasten the decline of the Delta.

Ratepayers will face increased water bills and property taxes, with no assurance of a sustainable water supply if Valley Water continues to spend millions of dollars - nearly \$650 million by the final construction vote - on this project! Remember that the board is ultimately accountable to their ratepayers who do not want their bills to rise amid an era of constant inflation and an affordability crisis.

The Delta tunnel project is an expensive and environmentally harmful project - failing to ensure new water resources in a time of climate change. Valley Water must prioritize limited public funds for projects that will deliver tangible improvements in water security and the overall health of the Delta.

I urge you to make a responsible and informed decision by rejecting this funding, and voting NO on Agenda Item 3.5.

Sincerely,

Sincerely,

Katja Irvin

Dear Valley Water Board of Directors,

More water must not be drawn from northern/central California to still not satisfy southern California's insatiable thirst. People must accept that south of the Tehachapi Mnts is all DESERT and live accordingly. Providing water from snow that falls on Mt. Shasta so people can grow more lawns in SoCal is unsustainable, very expensive, and environmentally irresponsible. NO Delta Tunnel(s)!

Dear Chair Estremera and the Board of Directors,

I am writing to urge Valley Water not to allocate any additional funds to the proposed Delta Conveyance Project and vote no on Agenda Item 3.5.

The Delta tunnel project is a proposal to construct a single underground tunnel to divert millions of acre-feet of freshwater that would otherwise flow naturally through the Bay-Delta, diverting up to 6,000 cubic feet per second (cfs) from the Sacramento River without preserving sufficient flows for salmon species and Delta smelt.

Dear Valley Water Board of Directors,

There is simply too much at stake to alter nature's natural flow of water, especially when it is not clear, who it benefits, how it benefits, and why this is on the table. This could affect many people and residences throughout California, let alone the wildlife and underwater habitats. Priority needs to be made to benefit California civilians and not mega donors and businesses, which appear this project benefits the most. Please put this up for Vote with the California people at the minimum!

Dear Chair Estremera and the Board of Directors,

I am writing to urge Valley Water not to allocate any additional funds to the proposed Delta Conveyance Project and vote no on Agenda Item 3.5.

For years, the Bay-Delta ecosystem has been severely depleted of its essential freshwater flows, causing the destruction of natural habitat for endemic species and worsening the livelihood of residents in Delta communities. This project will absolutely hasten the decline of the Delta.

Ratepayers will face increased water bills and property taxes, with no assurance of a sustainable water supply if Valley Water continues to spend millions of dollars - nearly \$650 million by the final construction vote - on this project! Remember that the board is ultimately accountable to their ratepayers who do not want their bills to rise amid an era of constant inflation and an affordability crisis.

The Delta tunnel project is an expensive and environmentally harmful project - failing to ensure new water resources in a time of climate change. Valley Water must prioritize limited public funds for projects that will deliver tangible improvements in water security and the overall health of the Delta.

I urge you to make a responsible and informed decision by rejecting this funding, and voting NO on Agenda Item 3.5.

Sincerely,

Sincerely,

Nona Weiner
