Dear Board Members of Valley Water,

It is of the utmost importance that you consider the unique requirements for building this massive project. It is both remote and complex and you need to be thoroughly informed of all aspects before you commit to building this reservoir. I agree with and support the comments provided by the Sierra Club. We all know the devil is in the details, and there are many for this project.

I think that the complex requirements will outweigh the benefits.

As a South County resident I am acutely aware of the difficulties with access to the site, intrusion into Coe Park and many environmental problems associated with the project. Therefore I oppose it.

Sincerely,

Jim and Connie Rogers
