**Subject:** Item 2.1 Board meeting June 9th

**Follow Up Flag:** Follow up  
**Flag Status:** Completed

Dear Board members,

I appreciate your leadership and engagement to ensure we will deal with this drought and water shortage adequately.

I will do my part to conserve. For sure!

Here is my ask for your consideration

- Please consider measures to expand our reservoirs. The Anderson reservoir retrofitting project has not moved forward much. We should get it done ASAP. During the last drought, the water level was down to 10%, and the timing would have been perfect. Please treat this project with urgency!
- The push for high-density housing via bills such as SB-9 and SB-10 in California and Silicon Valley will only expand the population. What are you going to do to ensure we meet the needs of our population and future droughts? We need to find new resources and avenues for water, including the ability to store water. Please plan for the future growth of the valley.
- Finally, please do not provide any avenue for San Jose Water Company to increase their profits via rate increases or the one word that gets them VERY excited "surcharges". In 2016, their profits went from \$22m (baseline) to \$52m thanks to the surcharges they imposed upon us based on Valley Water's conservation mandate. But there is more; because we conserved, they claimed they did not hit their revenue threshold and they filed for a rate increase to supplement their already burgeoning profits. Bizarre behavior by our water company! Please do not help increase their profits any more!

My thanks to each of you for your leadership and for doing your utmost to represent the people of Santa Clara county well.

**Subject:** Item 2.1 Board meeting June 9th

Dear Board members,

I appreciate your leadership and engagement to ensure we will deal with this drought and water shortage adequately. My family and I will do my part to conserve. For sure!

Here is my ask for your consideration:

- Please consider measures to expand our reservoirs. The Anderson reservoir retrofitting project has not moved forward much. We should get it done ASAP. During the last drought, the water level was down to 10%, and the timing would have been perfect. Please treat this project with urgency

- The push for high-density housing via bills such as SB-9 and SB-10 in California and Silicon Valley will only expand the population. What are you going to do to ensure we meet the needs of our population and future droughts? We need to find new resources and avenues for water, including the ability to store water. Please plan for the future growth of the valley.

- Finally, PLEASE do not provide any avenue for San Jose Water Company, a FOR PROFIT COMPANY, to increase their profits via rate increases or the one word that gets them VERY excited "surcharges". In 2016, their profits went from \$22m (baseline) to \$52m thanks to the surcharges they imposed upon us based on Valley Water's conservation mandate. My water bill more than tripled even though I used less water than before. But there is more; because we conserved, they claimed they did not hit their revenue threshold and they filed for a rate increase to supplement their already burgeoning profits. Unacceptable behavior by a monopoly water company! Please do not help increase their profits any more.

My thanks to each of you for your leadership and for doing your utmost to represent the people of Santa Clara county well.

Ergun Genc  
Saratoga, CA

Dear Board members,

I appreciate your leadership and engagement to ensure we will deal with this drought and water shortage adequately. I will do my part to conserve. For sure! Here is my ask for your consideration - Please consider measures to expand our reservoirs. We cannot under utilize Anderson reservoir. The retrofitting project has not moved forward as it should have. The Federal Dam regulators eventually asked the dam be drained because it posed a risk during an earthquake. I know you will get the dam earthquake ready and available at full capacity ASAP. - The push for high-density housing via bills such as SB-9 and SB-10 in California and Silicon Valley will only expand the population. What are you going to do to ensure we meet the needs of our population and future droughts? We need to find new resources and avenues for water, including the ability to store water. Please plan for the future growth of the valley. - Finally, please do not provide any avenue for San Jose Water Company to increase their profits via rate increases or the one word that gets them VERY excited "surcharges". In 2016, their profits went from \$22m (baseline) to \$52m thanks to the surcharges they imposed upon us based on Valley Water's conservation mandate.
