Dear Board members,

I appreciate your leadership and engagement to ensure we will deal with this drought and water shortage adequately.

I will do my part to conserve. For sure!

Here is my ask for your consideration

- Please consider measures to expand our reservoirs. We cannot under utilize Anderson reservoir. The retrofitting project has not moved forward as it should have. The Federal Dam regulators eventually asked the dam be drained because it posed a risk during an earthquake. I know you will get the dam earthquake ready and available at full capacity ASAP.

- The push for high-density housing via bills such as SB-9 and SB-10 in California and Silicon Valley will only expand the population. What are you going to do to ensure we meet the needs of our population and future droughts? We need to find new resources and avenues for water, including the ability to store water. Please plan for the future growth of the valley.

- Finally, **please do not provide any avenue for San Jose Water Company** to increase their profits via rate increases or the one word that gets them VERY excited "surcharges". In 2016, their profits went from \$22m (baseline) to \$52m thanks to the surcharges they imposed upon us based on Valley Water's conservation mandate. But there is more; because we conserved, they claimed they did not hit their revenue threshold and they filed for a rate increase to supplement their already burgeoning profits. Bizarre behavior by our water company! Please do not help increase their profits any more!

My thanks to each of you for your leadership and for doing your utmost to represent the people of Santa Clara county well.

Dear Board members,

I appreciate your leadership and engagement to ensure we will deal with this drought and water shortage adequately.

I will do my part to conserve.

Please consider measures to expand our reservoirs. We cannot under utilize Anderson reservoir. The retrofitting project has not moved forward as it should have. I know you will get the dam earthquake ready and available at full capacity ASAP.

Please do not permit The San Jose Water company to increase their profits via rate increases or with "surcharges". In 2016, their profits went from \$22m (baseline) to \$52m thanks to the surcharges they imposed upon us based on Valley Water's conservation mandate. Because we conserved, San Jose Water claimed they did not hit their revenue threshold and they filed for a rate increase to supplement their already burgeoning profits. Please do not help increase their profits.

The replacement of infrastructure, that probably is fully depreciated, should be financed with corporate paper (i.e. bonds, stock, bank) not by customer rate increases.

Dear Board members,

I appreciate your leadership and engagement to ensure we will deal with this drought and water shortage adequately.

I will do my part to conserve water in my neighborhood.

Please before taking any action that could harm our community, consider the following items:

- Please consider measures to expand our reservoirs. We cannot underutilize Anderson reservoir. The retrofitting project has not moved forward as it should have. The Federal Dam regulators eventually asked the dam be drained because it posed a risk during an earthquake. I know you will get the dam earthquake ready and available at full capacity ASAP.
- The push for high-density housing via bills such as SB-9 and SB-10 in California and Silicon Valley will only expand the population. What are you going to do to ensure we meet the needs of our population and future droughts? We need to find new resources and avenues for water, including the ability to store water. Please plan for the future growth of the valley.
- Finally, **please do not provide any avenue for San Jose Water Company** to increase their profits via rate increases or the one word that gets them VERY excited "surcharges". In 2016 their profits went from \$22m (baseline) to \$52m thanks to the surcharges they imposed upon us based on Valley Water's conservation mandate. But there is more. Dear Board members,

As a long time resident I am writing on behalf of my family and neighbors to express our concerns about lack of prudent management of our water resources in the state and county.

We live in a semi arid climate which cycles through drought regularly .Despite this long known fact we have added zero reservoir capacity since 1979 while our population has grown by 15 million !

What is your board doing to push the state to increase our reservoir capacity to keep up with our population growth ? It appears your strategy is to ration water during droughts by raising prices.That maybe the only option you have because of state governments reluctance to come up with a rational water plan .Residents of this county will no longer accept San Jose Water Company to use rationing as an excuse to price gouge its customers.

If price rationing is needed the excess profits should not go as windfall bonuses to SJWC executives , they must be directed to badly needed funds to fix our old wasteful delivery system

We look forward to hearing your plans on these important issues .

Respectfully

Patrick J Brockett

Dear Board members,

I appreciate your leadership and engagement to ensure we will deal with this drought and water shortage adequately.

I have been extremely conservative for many years.

Here is my ask for your consideration

- Please consider measures to expand our reservoirs build new reservoirs. We cannot under utilize Anderson reservoir. The retrofitting project has not moved forward as it should have. The Federal Dam regulators eventually asked the dam be drained because it posed a risk during an earthquake. I know you will get the dam earthquake ready and available at full capacity ASAP.

- We NEED ADDITIONAL SOURCES OF WATER TO PROVIDE FOR THE NEEDS OF OUR CURRENT COMMUNITY, as evidenced by purchasing from outside sources.

- The push for high-density housing via bills such as SB-9 and SB-10 in California and Silicon Valley will only expand the population. What are you going to do to ensure we meet the needs of our CURRENT population plus the growth, and worse during future droughts? We need to find new resources and avenues for water, including the ability to store water. Please plan for the future growth of the valley.

- Finally, please do not provide any avenue for San Jose Water Company to increase their profits via rate increases or the one word that gets them VERY excited "surcharges". In 2016, their profits went from \$22m (baseline) to \$52m thanks to the surcharges they imposed upon us based on Valley Water's conservation mandate. But there is more; because we conserved, they claimed they did not hit their revenue threshold and they filed for a rate increase to supplement their already burgeoning profits. What are you going to do to ensure we meet the needs of the new housing and future droughts? We need to find new resources and avenues for water, including the ability to store water. Please plan for the future growth of the valley.
- Finally, please do not provide any avenue for San Jose Water Company to increase their profits via rate increases or the one word that gets them VERY excited "surcharges". In 2016, their profits went from \$22m (baseline) to \$52m thanks to the surcharges they imposed upon us based on Valley Water's conservation mandate. But there is more; because we conserved, they claimed they did not hit their revenue threshold and they filed for a rate increase to supplement their already burgeoning profits. Bizarre behavior by our water company! Please do not help increase their profits any more! Please do not allow them surcharges especially because they have been through a draught and should be prepared for the next one.

Our thanks to each of you for your leadership and for doing your utmost to represent the people of Santa Clara county well.

Dear Board members,

I appreciate your leadership and engagement to ensure we will deal with this drought and water shortage adequately.

I will do my part to conserve. For sure!

Here is my ask for your consideration

- Please consider measures to expand our reservoirs. We cannot under utilize Anderson reservoir. The retrofitting project has not moved forward as it should have. The Federal Dam regulators eventually asked the dam be drained because it posed a risk during an earthquake. I know you will get the dam earthquake ready and available at full capacity ASAP.
- The push for high-density housing via bills such as SB-9 and SB-10 in California and Silicon Valley will only expand the population. What are you going to do to ensure we meet the needs of our population and future droughts? We need to find new resources and avenues for water, including the ability to store water. Please plan for the future growth of the valley.
- Finally, **please do not provide any avenue for San Jose Water Company** to increase their profits via rate increases or the one word that gets them VERY excited "surcharges". In 2016, their profits went from \$22m (baseline) to \$52m thanks to the surcharges they imposed upon us based on Valley Water's conservation mandate. Dear Board members,

I appreciate your leadership and engagement to ensure we will deal with this drought and water shortage adequately. I will certainly do my part to conserve.

I please ask for your consideration of the following

- Please consider measures to expand our reservoirs. The Anderson reservoir retrofitting project has not moved forward much. We should get it done ASAP. During the last drought, the water level was down to 10%, and the timing would have been perfect. Please treat this project with urgency!
- The push for high-density housing via bills such as SB-9 and SB-10 in California and Silicon Valley will only expand the population. What are you going to do to ensure we meet the needs of our population and future droughts? We need to find new resources and avenues for water, including the ability to store water. Please plan for the future growth of the valley.
- Finally, please do not provide any avenue for San Jose Water Company to increase their profits via rate increases or the one word that gets them VERY excited "surcharges". In 2016, their profits went from \$22m (baseline) to \$52m thanks to the surcharges they imposed upon us based on Valley Water's conservation mandate. But there is more; because we conserved, they claimed they did not hit their revenue threshold and they filed for a rate increase to supplement their already burgeoning profits. Bizarre behavior by our water company! Please do not help increase their profits any more!

My thanks to each of you for your leadership and for doing your utmost to represent the people of Santa Clara county well.

Dear Board members, I appreciate your leadership and engagement to ensure we will deal with this drought and water shortage adequately. I will do my part to conserve. For sure!

Here is my ask for your consideration - Please consider measures to expand our reservoirs. The Anderson reservoir retrofitting project has not moved forward much. We should get it done ASAP. During the last drought, the water level was down to 10%, and the timing would have been perfect. Please treat this project with urgency! - The push for high-density housing via bills such as SB-9 and SB-10 in California and Silicon Valley will only expand the population. What are you going to do to ensure we meet the needs of our population and future droughts? We need to find new resources and avenues for water, including the ability to store water. Please plan for the future growth of the valley.

- Finally, please do not provide any avenue for San Jose Water Company to increase their profits via rate increases or the one word that gets them VERY excited "surcharges". In 2016, their profits went from \$22m (baseline) to \$52m thanks to the surcharges they imposed upon us based on Valley Water's conservation mandate. Dear Valley Water Board members,

I appreciate your leadership and engagement to ensure we will deal with this drought and water shortage, and I will continue to do my part to conserve our water usage.

I ask that you please consider the following at your meeting:

- Consider measures to expand our reservoirs. The Anderson Reservoir retrofitting project has not moved forward as it should have. The Federal Dam regulators eventually asked the dam be drained because it posed a risk during an earthquake. Please expedite getting the dam earthquake ready and available at full capacity ASAP.
- The push for high-density housing via bills such as SB-9 and SB-10 in California and Silicon Valley will only expand the population. What are you going to do to ensure we meet the needs of our population and future droughts? We need to find new resources and avenues for water, including the ability to store water. Please plan for the future growth of the valley.
- Finally, please do not provide any avenue for San Jose Water Company to increase their profits via rate increases or the one word that gets them VERY excited "surcharges". In 2016, their profits went from \$22m (baseline) to \$52m thanks to the surcharges they imposed upon us based on Valley Water's conservation mandate. But there is more; because we conserved, they claimed they did not hit their revenue threshold and they filed for a rate increase to supplement their already burgeoning profits. Bizarre behavior by our water company! Please do not help increase their profits any more!

Please plan for the future growth of the valley.
- Finally, please do not provide any avenue for San Jose Water Company to increase their profits via rate increases or the one word that gets them VERY excited "surcharges". In 2016, their profits went from \$22m (baseline) to \$52m thanks to the surcharges they imposed upon us based on Valley Water's conservation mandate. But there is more; because we conserved, they claimed they did not hit their revenue threshold and they filed for a rate increase to supplement their already burgeoning profits. Bizarre behavior by our water company! Please do not help increase their profits any more!

My thanks to each of you for your leadership and for doing your utmost to represent the people of Santa Clara county well.

Dear Board members,

I appreciate your leadership and engagement to ensure we will deal with this drought and water shortage adequately. I will do my part to conserve. For sure! Here is my ask for your consideration - Please consider measures to expand our reservoirs. We cannot under utilize Anderson reservoir. The retrofitting project has not moved forward as it should have. The Federal Dam regulators eventually asked the dam be drained because it posed a risk during an earthquake. I know you will get the dam earthquake ready and available at full capacity ASAP. - The push for high-density housing via bills such as SB-9 and SB-10 in California and Silicon Valley will only expand the population. What are you going to do to ensure we meet the needs of our population and future droughts? We need to find new resources and avenues for water, including the ability to store water. Please plan for the future growth of the valley.

Finally, please do not provide any avenue for San Jose Water Company to increase their profits via rate increases or the one word that gets them VERY excited "surcharges". In 2016, their profits went from \$22m (baseline) to \$52m thanks to the surcharges they imposed upon us based on Valley Water's conservation mandate. But there is more; because we conserved, they claimed they did not hit their revenue threshold and they filed for a rate increase to supplement their already burgeoning profits. Bizarre behavior by our water company!

Please do not help increase their profits any more! My thanks to each of you for your leadership and for doing your utmost to represent the people of Santa Clara county well.

To: Board of Directors
Subject: Item 2.1 Board meeting June 9th

Dear Board members,

Thank you for your support and leadership to ensure we can deal with the drought and water shortage. I would like to take this opportunity to ask for your help in avoiding San Jose Water company to increase their rates and profits via surcharges. In 2016, their profits went from \$22m (baseline) to \$52m thanks to these surcharges they imposed upon us based on Valley Water's conservation mandate. Our efforts to conserve water were successful, but San Jose Water Company claimed that they did not hit their revenue threshold and they filed for a rate increase to supplement their profits. Very strange and counterintuitive to have done this. Please do not help increase their profits any more!
Thank you for your leadership and representation of the people of Santa Clara county.

Subject: Item 2.1 Board meeting June 9th

Dear Board members,

We appreciate your leadership and engagement to ensure we will deal with this drought and water shortage adequately for all Santa Clara Valley water consumers.

We, as SJWC water supplied consumers, will do our part to conserve. For sure!

Here is my ask for your consideration:

- Please consider measures to expand our reservoirs. The Anderson reservoir retrofitting project has not moved forward much. We should get it done ASAP. During the last drought, the water level was down to 10%, and the timing would have been perfect. Please treat this project with urgency!

- The push for high-density housing via bills such as SB-9 and SB-10 in California and Silicon Valley will only expand the population. What are you going to do to ensure we meet the needs of our population and future droughts? We need to find new resources and avenues for water, including the ability to store water. Please plan for the future growth of the valley.

- Finally, please do not provide any avenue or reason for San Jose Water Company to increase their profits via rate increases or the one word that gets them VERY excited %26surcharges%26.

In 2016, their profits went from \$22m (baseline) to \$52m thanks to the surcharges they imposed upon us based on Valley Water's conservation mandate.

But there is more; because we conserved, they claimed they did not hit their revenue threshold and they filed for a insane rate increase to supplement their already burgeoning profits. Bizarre behavior by our water company! Please do not help increase their profits any more! We already have the most expensive water rates in the nation. And we are not in the middle of a desert like Las Vegas, which had cheaper rates! HELP!!

My thanks to each of you for your leadership and for doing your utmost to represent the people of Santa Clara county well.

Sincerely,

-Vishwanath and Vaishali Nayak

Dear Board members,

I thank you for your leadership to ensure we deal with this drought season and water shortage.

Here is my request for your kind consideration -

Please prioritize measures to expand our water reservoirs. We cannot under utilize Anderson reservoir. The retrofitting project has not moved forward as it should have. The Federal Dam regulators eventually asked the dam be drained because it posed a risk during an earthquake. I know you will get the dam earthquake ready and available at full capacity ASAP.

The push for high-density housing via bills such as SB-9 and SB-10 in California and Silicon Valley will only expand the population. What are you going to do to ensure we meet the needs of our population and future droughts? We need to find new resources and avenues for water, including the ability to store water. Please plan for the future growth of the valley.

Finally, last but not least, **please do not provide any support for San Jose Water Company to increase their profits via price hikes or rate increases or any kind of "surcharges".**

In 2016, their profits went from \$22m (baseline) to \$52m thanks to the surcharges they imposed upon us based on Valley Water's conservation mandate. But there is more; because we conserved, they claimed they did not hit their revenue threshold and they filed for a rate increase to supplement their already burgeoning profits. Bizarre behavior by our very greedy for profit water company.

Please do not help increase their profits any more.

My thanks to each of you for your leadership and for doing your utmost to represent the people of Santa Clara county well.

Subject: Item 2.1 Board meeting June 9th

Dear Board Members,

I appreciate your leadership and engagement to ensure we will deal with this drought and water shortage adequately. I have already and will continue to do my part to conserve. Since the last drought, I have installed drought tolerant landscaping where three lawns once were. I have cut water usage by 40%.

Here is my ask for your consideration

- Please consider measures to expand our reservoirs. We cannot underutilize Anderson reservoir. The retrofitting project has not moved forward as it should have. The Federal Dam regulators eventually asked the dam be drained because it posed a risk during an earthquake. I know you will get the dam earthquake ready and available at full capacity ASAP.

- The push for high-density housing via bills such as SB-9 and SB-10 in California and Silicon Valley will only expand the population. What are you going to do to ensure we meet the needs of our population and future droughts? We need to find new resources and avenues for water, including the ability to store water. Please plan for the future growth of the valley.

- Finally, please do not provide any avenue for San Jose Water Company to increase their profits via rate increases or the one word that gets them VERY excited "surcharges". In 2016, their profits went from \$22m (baseline) to \$52m thanks to the surcharges they imposed upon us based on Valley Water's conservation mandate. But there is more: because we conserved, they claimed they did not hit their revenue threshold and they filed for a rate increase to supplement their already burgeoning profits. Bizarre behavior by our water company! Please do not help increase their profits any more!

If there are surcharges, I ask that they be passed through SJW and go towards some public benefit, like paying for the Anderson Dam repair.

My thanks to each of you for your leadership and for doing your utmost to represent the people of Santa Clara County well.

Sincerely,
Dave Scott

Subject: Item 2.1 Board meeting June 9th

Dear Board members,

I appreciate your leadership and engagement to ensure we will deal with this drought and water shortage adequately.

I will do my part to conserve. For sure!

Here is my ask for your consideration

- Please consider measures to expand our reservoirs. We cannot under utilize Anderson reservoir. The retrofitting project has not moved forward as it should have. The Federal Dam regulators eventually asked the dam be drained because it posed a risk during an earthquake. I know you will get the dam earthquake ready and available at full capacity ASAP.
- The push for high-density housing via bills such as SB-9 and SB-10 in California and Silicon Valley will only expand the population. What are you going to do to ensure we meet the needs of our population and future droughts? We need to find new resources and avenues for water, including the ability to store water. Please plan for the future growth of the valley.
- Finally, **please do not provide any avenue for San Jose Water Company** to increase their profits via rate increases or the one word that gets them VERY excited "surcharges". In 2016, their profits went from \$22m (baseline) to \$52m thanks to the surcharges they imposed upon us based on Valley Water's conservation mandate. But there is more; because we conserved, they claimed they did not hit their revenue threshold and they filed for a rate increase to supplement their already burgeoning profits. Bizarre behavior by our water company! Please do not help increase their profits any more!

My thanks to each of you for your leadership and for doing your utmost to represent the people of Santa Clara county well.
