I believe you should have received my request to speak at the meeting next Tuesday 1 p.m. regarding WaterFix, the Delta Tunnels proposal.

By way of background I was Deputy Director of the California Department of Water Resources from 2000 to 2004. I am currently Senior Water Policy Advisor at the Planning and Conservation League. I have testified before the legislature on the project and am a party in the State Water Resources Control Board's proceeding to consider permits for the project. We have commissioned economic analyses of the project.

Below is the second of two handouts I will be using for my presentation at the January 26th meeting re the Delta tunnels. I will be bringing 15 hard copies and would appreciate having the electronic version included in your posted information.

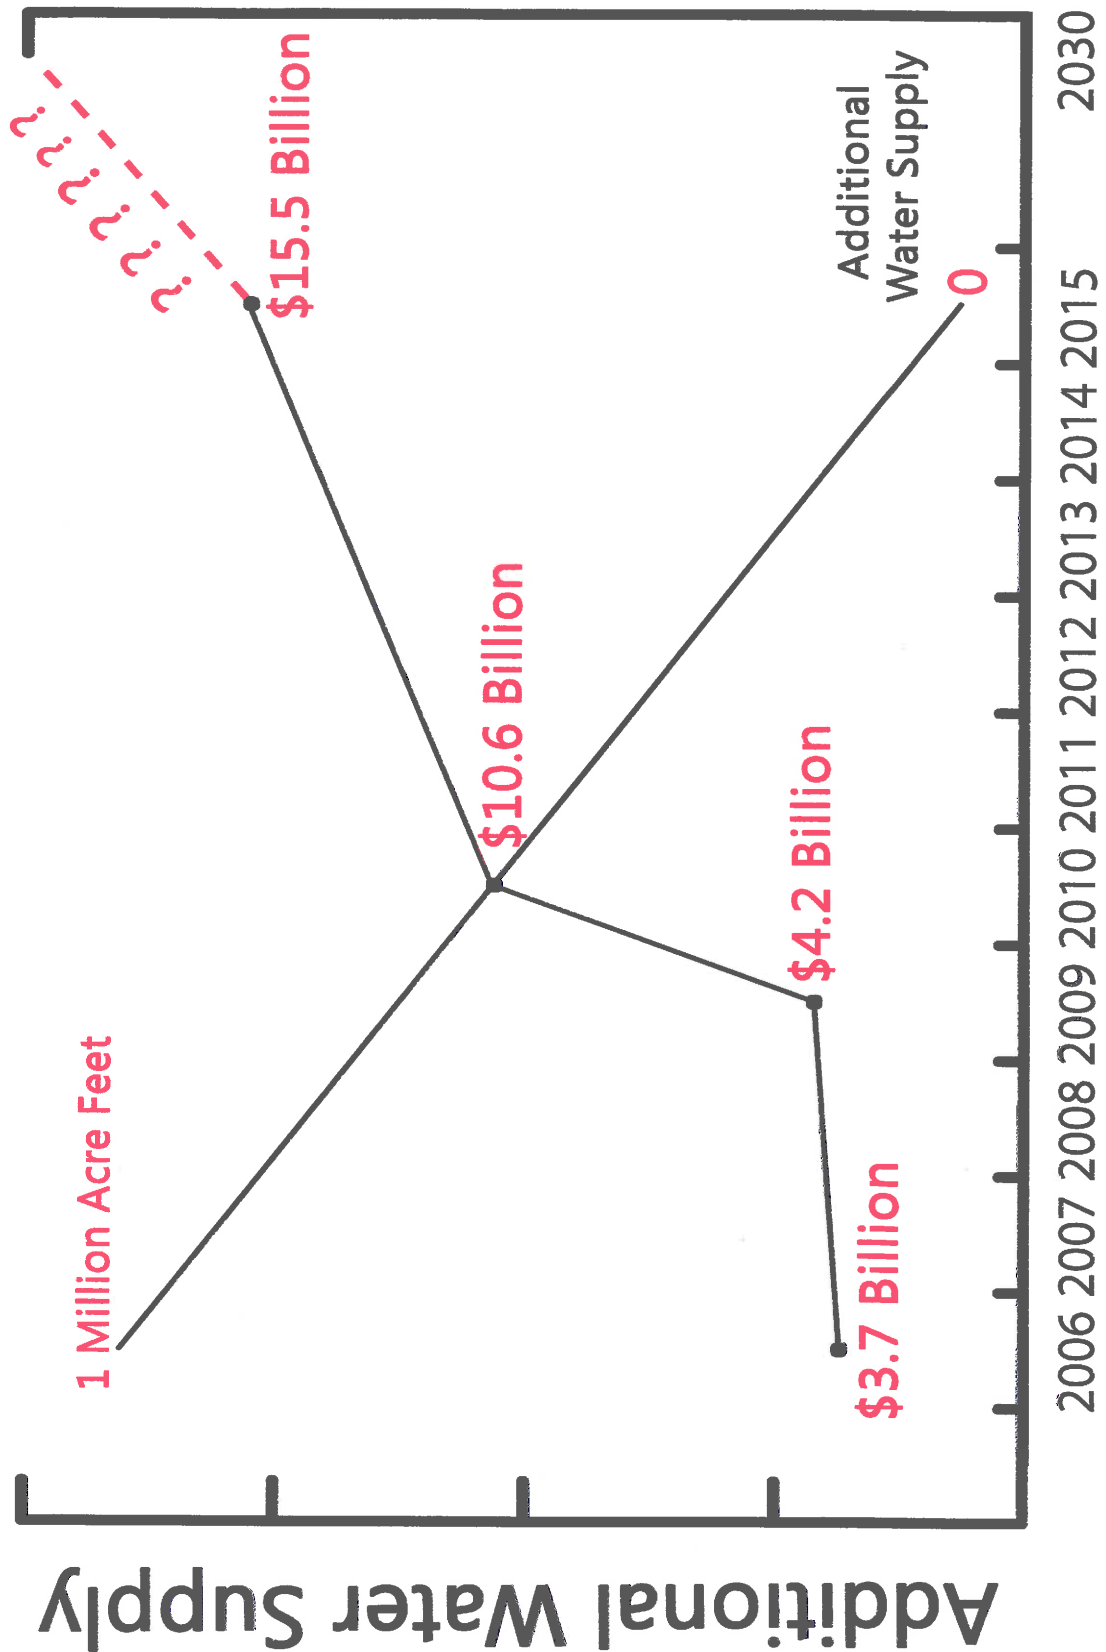

My second email will include the second chart that I would also like to have included. If you have any questions please contact me at (916) 719-4049.

thank you very much.

Here is the second handout for my presentation to the Board next Tuesday. I would appreciate it if it could be included with the materials posted for the meeting.
