The Pacheco Dam Project is flawed for many reasons

The Draft EIR must be redone. This will add expense and time to the project.

The environment will suffer as many native plants, insects, and animals will die

The cost of the project - weighed against the benefit is too high.

We don't need this dam, the money could be used on other projects.

The Pacheco Dam must be stopped before the destruction, financial and time loss is greater.

Stop it now. Serious.
