Valley Water entered into a Water Infrastructure Finance and Innovation Act (WIFIA) loan agreement with the U.S. Environmental Protection Agency (EPA) for the Project. The WIFIA established a federal credit program (WIFIA program) authorizing EPA to provide direct loans and loan guarantees to eligible borrowers for water infrastructure projects. Because the WIFIA loan proceeds may be used to pay for the Services rendered pursuant to this Agreement, Consultant is required to adhere to certain federal contract provisions, which are attached hereto as Exhibit A, Federal Requirements, to Appendix One, Additional Legal Terms, and incorporated into this Agreement by this reference. Consultant agrees to adhere to such applicable Federal Contract Provisions.

Recipients of federal financial assistance may not pay any person for influencing or attempting to influence any officer or employee of a federal agency, a member of Congress, an officer or employee of Congress, or an employee of a member of Congress with respect to the award, continuation, renewal, amendment, or modification of a federal grant loan, or contract. These requirements are implemented for USEPA in 40 CFR Part 34, which also describes types of activities, such as legislative liaison activities and professional and technical services, which are not subject to this prohibition. Upon award of this contract, Consultant shall complete and submit the certification and disclosure forms in Appendix A and Appendix B to 40 CFR Part 34. (EO 11246, 30 FR 12319, September 28, 1965) Consultant's compliance with Executive order 11246 shall be based on implementation of the Equal Opportunity Clause, and specific affirmative active obligations required by the Standard Federal Equal Employment Opportunity Construction Contract Specifications, as set forth in 41 CFR Part 60-4.

During the performance of this contract, the Consultant agrees as follows:

- a. The Consultant will not discriminate against any employee or applicant for employment because of race, color, religion, sex, sexual orientation, gender identity, or national origin. The Consultant will take such action with respect to any subcontract or purchase order as may be directed by the Secretary of Labor as a means of enforcing such provisions including sanctions for noncompliance: Provided, however, that in the event the Consultant becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction, the Consultant may request the United States to enter into such litigation to protect the interests of the United States. 2. Scope of Services

- A. This Schedule EP, Scope of Services describes the professional environmental planning and permitting services to be performed by Consultant for Valley Water's **Anderson Dam Seismic Retrofit Project** (ADSR Project or Project). Upon successful completion of the Project planning and environmental services, Valley Water may, at its discretion, choose to negotiate an amendment to this Agreement with Consultant to provide construction phase support services. Valley Water may, at its discretion, choose to initiate a new consultant agreement selection process for services for any subsequent phase(s) and/or utilize Valley Water staff to perform such services.

3. Project Objectives

- A. The objectives of the Project, consistent with Federal Energy Regulatory Commission (FERC) and the California Department of Water Resources, Division of Safety of Dams (DSOD) dam safety requirements, are to:
- 1) Seismically retrofit and maintain the dam so that Valley Water may continue to operate it at capacity. This objective would be achieved by:
 - a. Replacing the existing dam to withstand the maximum credible earthquake (MCEs) on the Calaveras and Coyote Creek Range Front Faults;
 - b. Replacing the existing spillway to meet FERC and DSOD safety requirements related to the safe passage of a probable maximum flood (PMF); and
 - c. Replacing the outlet works to meet current DSOD outlet works requirements and accommodate fault offset.
 - 2) Improve cost efficiency of dam operations by decommissioning the hydroelectric facility
 - 3) Avoid and minimize environmental effects of construction and operations.

SCHEDULE EP SCOPE OF SERVICES

4. Project Background

- A. The mission of the Santa Clara Valley Water District, now known as Valley Water, is to provide Silicon Valley safe, clean water for a healthy life, environment, and economy.

Valley Water is a public agency providing water supply, flood protection, and stream stewardship for Santa Clara County. Valley Water manages an integrated water resources system that includes the supply of clean safe water, flood protection and stewardship of streams on behalf of Santa Clara County's 2 million residents. Valley Water effectively manages ten dams and surface water reservoirs, three water treatment plants, a state-of-the-art water quality laboratory, and more than 275 miles of streams. For information about Valley Water, visit www.valleywater.org.

- B. Anderson Dam and Reservoir is a major water supply facility located adjacent to the City of Morgan Hill, California, about 18 miles southeast of San Jose. Anderson Reservoir is the largest of the ten reservoirs owned and operated by Valley Water and provides more water storage capacity than the other nine reservoirs combined. It is thus a critical facility to Valley Water and the communities it serves. The dam was completed in 1950 as a zoned, rockfill embankment. It has a height of approximately 240 feet and impounds up to 90,373 acre-feet (AF) of water at its maximum reservoir operating elevation.
- C. Anderson Dam and Reservoir is subject to dam safety regulation by the California Department of Water Resources DSOD and FERC as FERC Project 5737. Anderson Dam is classified under FERC guidelines as a "High Hazard Potential" dam due to the potential incremental loss of life should failure occur. Between 2008 and 2012, several dam safety deficiencies associated with seismic shaking, fault offset, flood capacity, and emergency drawdown capabilities were identified. The presence of liquefiable materials in the embankment and foundation of the dam could result in major slumping and failure of the embankment following a future large earthquake and the presence of active faults in the foundation that could rupture the existing low-level outlet. The spillway has inadequate capacity to safely pass large floods and the outlet does not have sufficient capacity to quickly draw down the reservoir during floods or other emergency events.
- D. The purpose of the ADSR Project is to seismically retrofit, maintain, and operate Anderson Dam and Reservoir to meet FERC and DSOD safety requirements, thereby allowing Valley Water to maximize water supply and related incidental benefits, while avoiding and minimizing environmental impacts of the implementation of those safety directives and requirements. The ADSR Project will require an extensive environmental compliance process, including evaluation under California Environmental Quality Act (CEQA) and regulatory permits.

5. ADSR Project Delivery Approach

Valley Water plans to deliver the ADSR Project by utilizing the retained independent, separate consulting firms as described below. The Consultant awarded under this Agreement will need to coordinate with the firms listed below as directed by Valley Water.

- A. Project Management Consultant (PMC Team) led by Black & Veatch Corporation has been retained to assist with managing and overseeing the delivery of the ADSRP Project at the direction of Valley Water.

SCHEDULE EP SCOPE OF SERVICES

- B. Planning Consultant (PC or Planning Team) led by HDR Engineering, Inc. (HDR), was retained to perform preliminary engineering services and to develop the required draft environmental documents (Draft Environmental Impact Report and Draft Environmental Impact Statement) in support of the ADSRP Project. Due to major changes in the ADSR Project objectives, the Planning Consultant Agreement with HDR was amended to reduce its scope of services, and then subsequently, the Agreement expired. HDR provided transition support services relating to Valley Water retaining Environmental Consultant, Horizon Water and Environmental, LLC (Horizon).
- C. Environmental Consultant (Previous EC or Environmental Team) led by Horizon Water and Environment, LLC (Horizon) prepared initial drafts of the Draft EIR. On November 1, 2021, Horizon was acquired by Montrose Environmental Group, Inc., and has continued to operate as a separate legal entity and wholly owned subsidiary of Montrose Environmental Group, Inc. since that date. On September 21, 2023, an amendment to the agreement was executed with Horizon to significantly reduce the environmental planning and regulatory permitting scope of services to be performed after release of the Draft Environmental Impact Report (EIR) for public review.
- D. A second Environmental Consultant (Current Consultant or EC) led by Rincon Consultants, Inc. (Rincon) was retained on July 13, 2023 to provide additional resources for technical editing, quality assurance, quality control, finalization of select sections, and document production of the initial Draft EIR sections prepared by Horizon. An amendment to the agreement directed Rincon to assist with the initial preparation of response to comments on the Draft Environmental Impact Report (EIR), and provide technical modeling support of select EIR sections. Consultant will also provide draft EIR materials related to air quality, greenhouse gas, and noise impact analyses.
- E. Design Consultant (Design Team), led by URS Corporation, DBA URS Corporation Americas, was retained to perform design services in compliance with Valley Water, DSOD, and FERC requirements in support of the Project, including developing the Project design, preparing construction documents, and providing engineering support for the bid process and during the construction phases of the Project.
- F. Construction Management Consultant (CM or Construction Manager), led by COWI North America, Inc., was retained to oversee the Anderson Dam Tunnel Project (ADTP) construction contract and coordinate with the Design Consultant during construction in conformance with the Design Consultant's engineering plans and specifications, stamped and signed by a registered engineer; DSOD and FERC's construction inspection and monitoring requirements; the Valley Water-certified environmental compliance, specifically the requirements defined in the mitigation and monitoring plan; and ADTP Project close-out in accordance with Valley Water requirements. The ADTP is a component of the FERC Order Compliance Project (FOCP), which FERC directs Valley to implement as an interim risk reduction measure while Valley Water is completing the design/planning and securing permits for ADSR Project.
