

WaterFix?

Deirdre Des Jardins
California Water Research

Concerns raised in Nov 2013 workshop

- Independent review by 5 scientists
 - Brian E. Gray
 - Jeffrey Mount
 - William Fleenor
 - Bruce Herbold
 - Wim Kimmerer

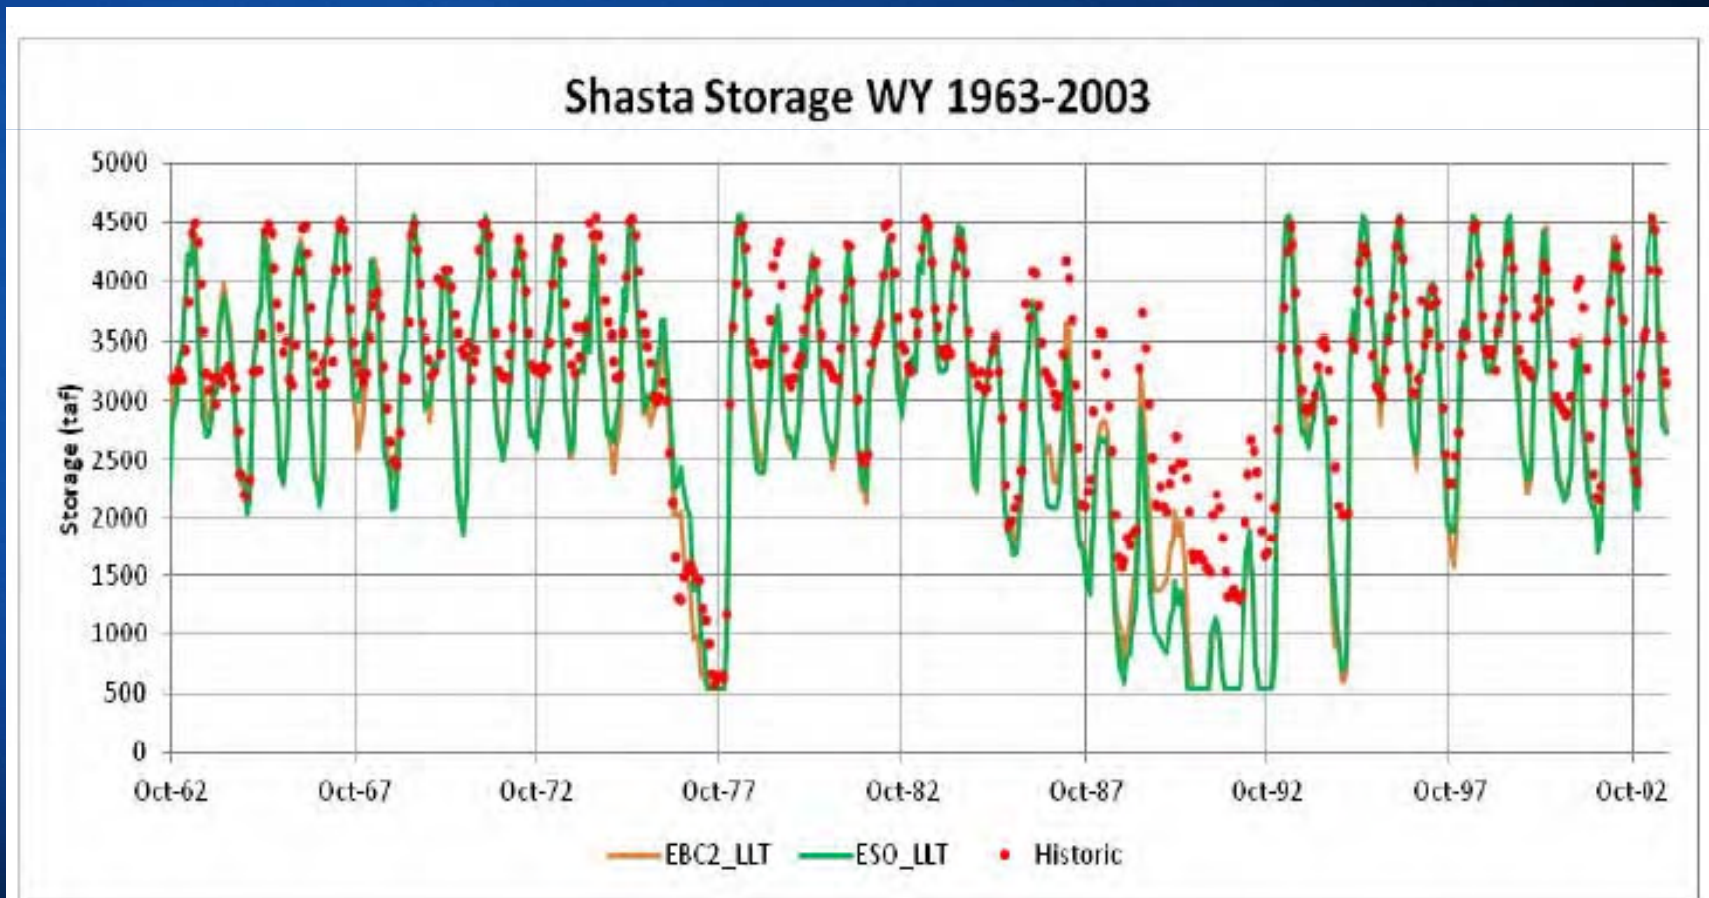

Project did not meet either of the coequal goals

Water Supply Reliability

- Only Low Outflow Scenario increased exports
- Low outflow scenario drains reservoirs to dead pool by 3rd or 4th year of multiyear drought
- No Action Alternative also drains reservoirs
- Not consistent with actual operations

Shasta storage

HANDOUT
JAN 26 2016
Item 2.2-J

SCVWD problems with low storage

- CVP supplies are junior to in-basin water users
- SCVWD multiyear storage is in Southern California at Semitropic
- Water transfers may not be available
