

Valley Water

Clean Water • Healthy Environment • Flood Protection

SVAWPC Storage Building

Presented by: David Van Zanen, Associate Engineer - Civil

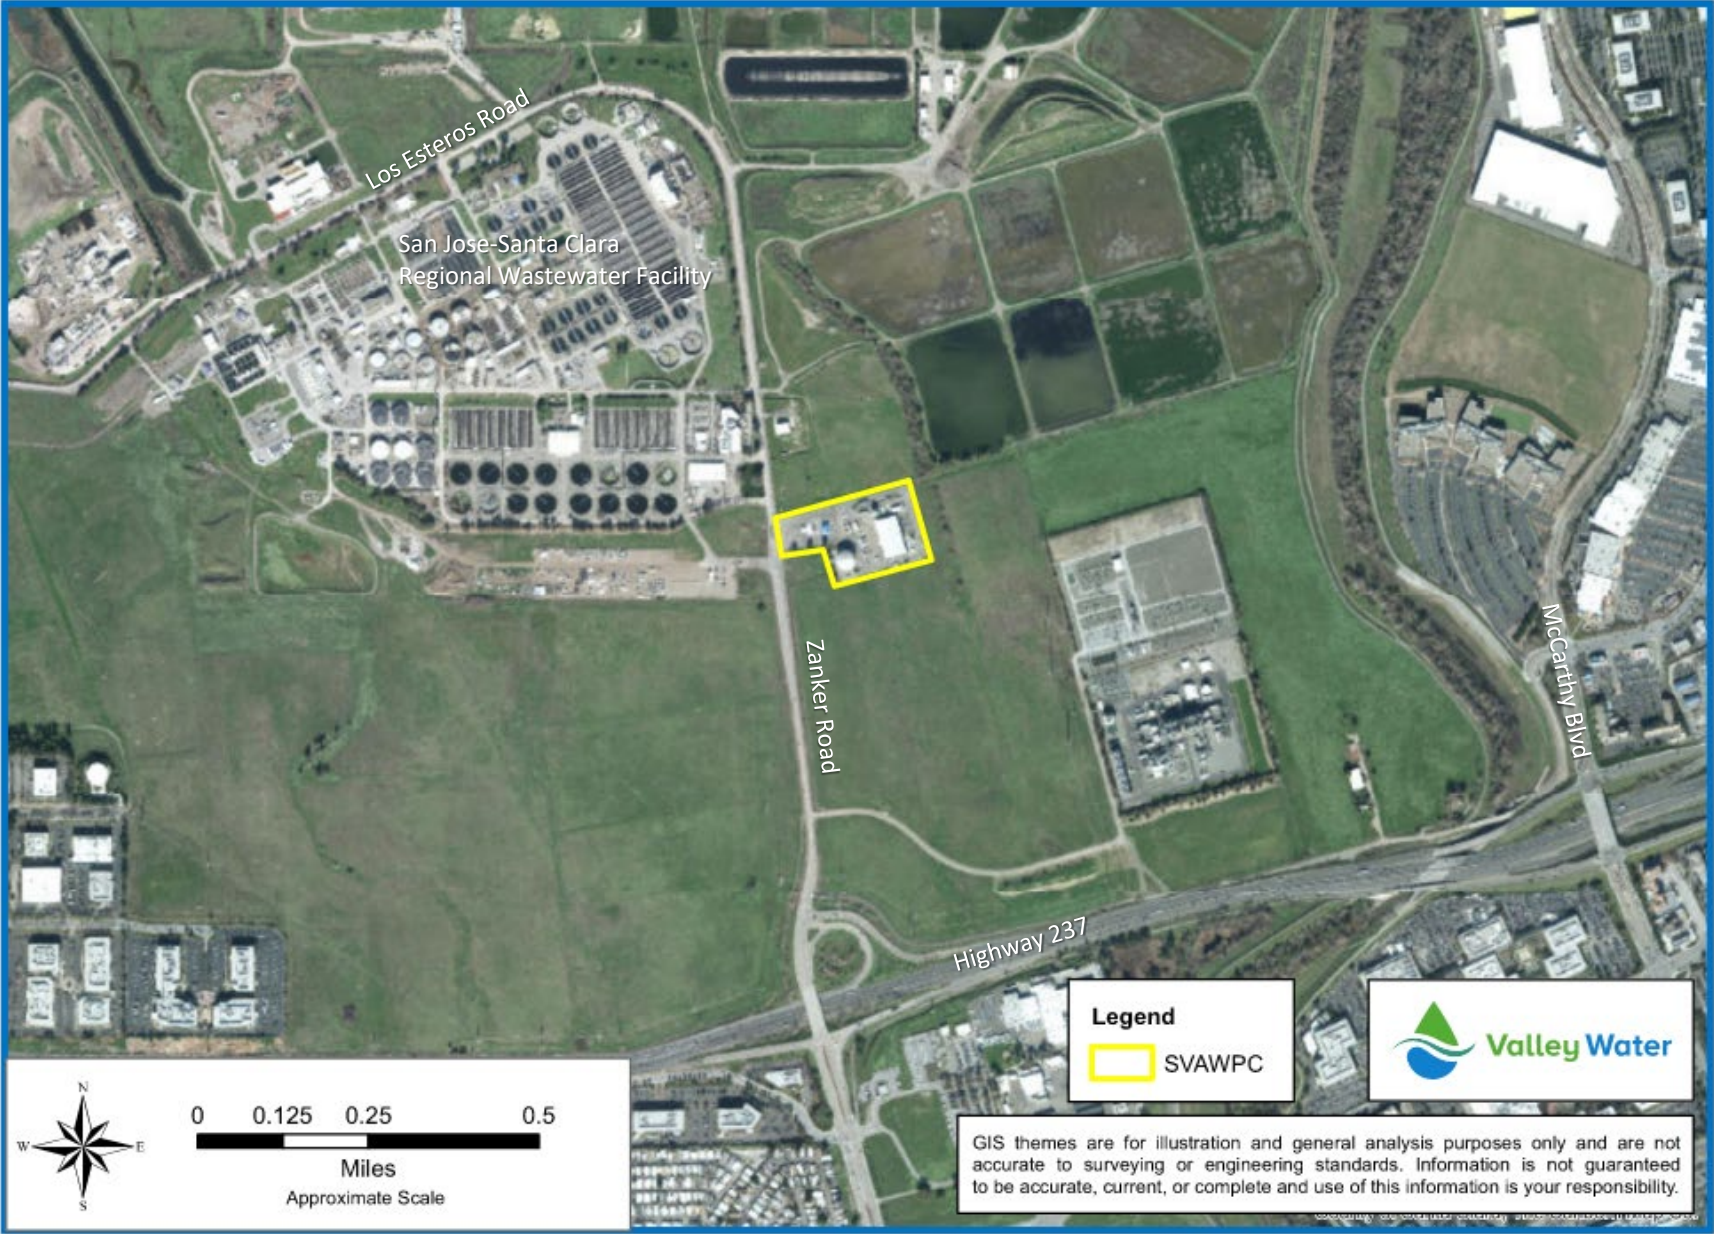

Project Objective

- Provide additional storage space needed to supply parts and materials for ongoing operations to provide purified water to the South Bay Water Recycling partnership.

Scope of Work

- Construct 1500 sf prefabricated metal storage building on a concrete slab foundation.
- Install pallet racks and shelving inside building.
- Provide electrical and fire suppression (sprinklers) connection to the storage building
- Upgrade fire suppression valves for existing process building.
