

Boardroom Technology Upgrades (HD Broadcast System)

Ashu/Sudhanshu Tikekar, Deputy Administrative Officer

Current challenges

- ▶ System uses **soon-to-be** obsolete analog video broadcast technology
- ▶ IT has spent over \$200,000 on repairs, maintenance, and replacements since 2006
- ▶ Internet streaming is the only option available to broadcast meetings
- ▶ Lack of support for the equipment from vendors

Benefits of the upgrade

- ▶ An enhanced viewer experience
- ▶ Easy to operate user-friendly system with enhanced capabilities for persons with disabilities
- ▶ Acquire and broadcast on PEG-TV channel for the benefits of seniors and elderly, and community out-reach
- ▶ Meet requirements of the stakeholders
- ▶ Deploy a system that can be supported and maintained by AV vendors
