Project Description

The Canoas Creek Rodent Damage Repair Project included:

- Reconstruction of approximately one mile of creek channel embankment and levee between Nightingale Drive and Hillsdale Road, and
- Installation of rodent-proof erosion control fabric over the surface of the reconstructed creek bank.

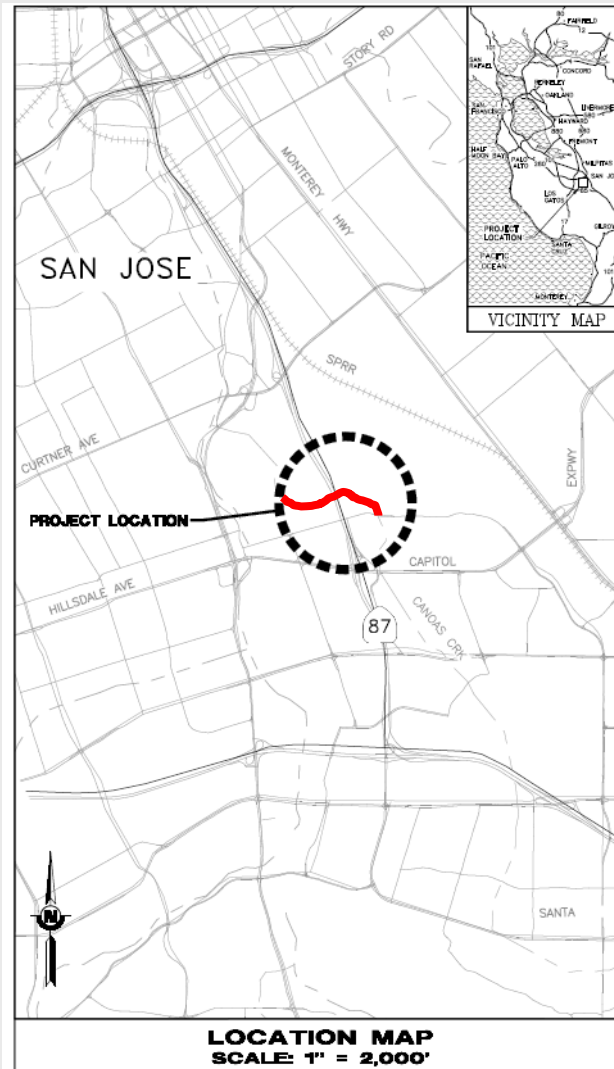

Project Objective

The objective of the Canoas Creek Rodent Damage Repair Project is to:

- Reduce frequent maintenance costs associated with routine bank erosion repair, and
- Reduce the risk of levee and embankment slope failure due to damage caused from burrowing animals.

Project Location

Canoas Creek between Nightingale Drive and Hillsdale Avenue

Santa Clara Valley
Water District
