| I would like to: | No Position-Comment Only |
| Comments: | 1. Why is the District continuing to pursue the Pacheco Reservoir Expansion Project? The staff report says "Staff analyzed the effect of these Board-approved projects, along with additional recharge in the Llagas Groundwater Subbasin that groundwater modeling indicates is needed to meet future demands, on water supply reliability." This indicates that the Pacheco Dam is not needed for water supply in the current planning horizon. Just because there is a grant opportunity out there is not reason enough to continue spending rate-payers money on this project. The District needs to focus on the already approved projects and revisit the dam in 5 years. Response requested. |
