

Water Supply Master Plan Update

January 8, 2019

Presentation Topics

Water Supply Master Plan Update 2040 Status

Recommended Water Supply Strategy

Water Supply Reliability Level of Service Goal

RoadMAP (Monitoring and Assessment Plan)

Next Steps

Droughts are, and will be, our greatest challenge to reliability

Many projects have been evaluated for filling the gap

Attachment 6 Page 4 of 27

Many strategies for water supply reliability have been evaluated

Stakeholder Input Summary

Input	Phone Survey – Likely Voters	Workshop #1 - Environmental, Civic Non- Profits, Individuals	Workshop #2 - Retailers
Water supply reliability important	X	X	X
Expand conservation, recycling, and reuse	X	X	X
Minimize rate increases	X	X	X

Additional takeaways:

- Voters like additional local and regional storage
- Environmental groups and others request reduced reliance on Delta
- Retailers would like better alignment between plans and actions

Updated Risk Analysis

Project	Risk Ranking
California WaterFix – Federal Side	Extreme
California WaterFix – State Side Only	High
No Regrets – Complete Package	Medium
No Regrets - Advanced Metering Infrastructure	Low
No Regrets – Graywater Rebate Program Expansion	Low
No Regrets - Leak Repair Incentives	Low
No Regrets - Model Water Efficient New Development Ordinance	Medium
No Regrets – Stormwater/Ag Land Recharge, San Jose, Saratoga	Low
No Regrets – Stormwater/Rain Barrels, Cisterns, Rain Gardens	Low
Pacheco Reservoir	Medium
Potable Reuse and/or Additional Non-Potable Reuse	Medium
South County Recharge	Low
Transfer-Bethany Pipeline	Medium

Technical Analyses Summary

Imported supplies generally less expensive, but less resilient to climate change and risks

Potable reuse generally more expensive, but more resilient to climate change and risks

Local surface water likely to become more variable in the future

Increasing variability and uncertainty associated with climate change

Projects with the greatest influence on reliability are generally imported water, reuse, and conservation

Based on stakeholder input and technical analyses, staff recommends:

- Reaffirming the 2012 "Ensure Sustainability"
 Strategy
- Updating the level of service goal
- Continuing regular review of the Water Supply Master Plan through a monitoring and assessment plan (MAP)

2012 Board-Adopted "Ensure Sustainability" Strategy

Secure existing supplies and infrastructure

Expand conservation and reuse

Optimize the system

Element 1: Secure Existing Supplies and Infrastructure

Secure existing infrastructure

 Dam retrofits, pipeline maintenance, treatment plants, other rehab projects

Secure existing local supplies

FAHCE, recharge capacity, natural groundwater recharge

Secure existing imported supplies

California WaterFix (CWF)

Element 2: Expand Conservation and Reuse

Expand Reuse

 P3 procurement for up to 24,000 AFY of potable reuse approved in December 2017

Expand Conservation

 "No Regrets" package of water conservation and stormwater projects approved for planning in September 2017

"No Regrets" Package

Program	Status
Advanced Metering Infrastructure (AMI)	Working with retailers on program definition
Graywate Rebate Program Expansion	Working with Ecology Action on direct installations
Leak Repair Incentives	Will be implemented based on AMI results
Model Water Efficient New Development Ordinance	Consultant in process of finalizing model ordinance
Stormwater-Ag Land Recharge	Pilot project being scoped
Stormwater- Rain Barrels and Cisterns	Implementing
Stormwater – Rain Gardens	Implementing
Stormwater – San Jose	Future project
Stormwater - Saratoga	Future project

Element 3: Optimize the system

South County Recharge

Provides additional recharge capacity to meet future demands

Pacheco Reservoir Expansion

- Increases capacity to store surplus flows
- Consistent with Board priorities

Transfer-Bethany Pipeline (part of Los Vaqueros Project)

- Included in FY 18/19 rate forecast
- Connects multiple regional systems

"Ensure Sustainability" Strategy

- Protects existing assets
- Leverages past investments
- Meets new demands with droughtresilient supplies
- Supports "One Water" approach
- Develops local and regional supplies to reduce reliance on the Delta
- Increases flexibility
- Increases resiliency to climate change

Level of Service Goal Revisions Presented to Water Conservation and Demand Management Committee on June 25, 2018

Develop water supplies designed to meet 100 percent of demands identified in the Urban Water Management Plan Water Supply Master Plan in non-drought years and at least 90 80 percent of average annual water demand in drought years.

Rationale

- 2017 Telephone Survey
- Stakeholder Input
- Incremental Costs
- Frequency of Shortage
- Planning for Uncertainty
- Benchmarking

Level of Service Goal Benchmarking

Agency	District Equivalent
Alameda County Water District	Meet at least 90% of demands during droughts
Zone 7 Water Agency	Meet at least 85% of demands during droughts
East Bay Municipal Utility District	Meet at least 85% of demands during droughts
Contra Costa Water District	Meet at least 85% of demands during droughts
San Francisco Public Utilities Commission	Meet at least 80% of demands during droughts
Marin Municipal Water District	Meet at least 75% of demands during droughts

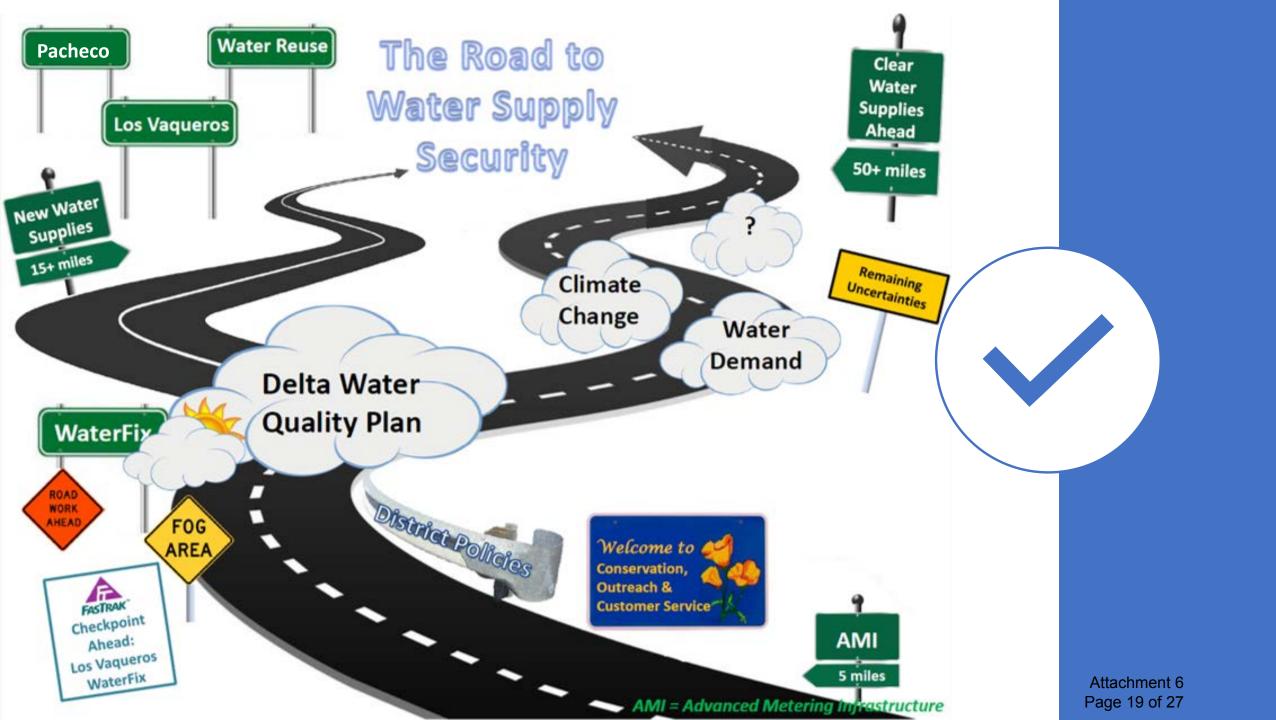

Incremental Benefits of Increasing Level of Service

Scenario	Without Projects (Basecase)	With Some Projects Approved for Planning	With All Projects Approved for Planning
Minimum Drought Reliability	Meets 50% of demands	Meets 80% of demands	Meets 90% of demands
Present Value Benefits (2017\$)	Not applicable	\$2,480,000,000	\$2,700,000,000
Present Value Cost to District (2017\$)	Not applicable	\$1,600,000,000	\$2,450,000,000
Benefit:Cost Ratio	Not applicable	1.6	1.1

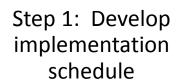

- Baseline Projects
- Baseline Projects
- No Regrets Package
- Potable Reuse
- South County Recharge
- WaterFix (State Side)

- Baseline Projects
- No Regrets Package
- Potable Reuse
- South County Recharge
- WaterFix (State Side)
- WaterFix (Federal Side)
- Pacheco Reservoir
- Transfer-Bethany Pipeline

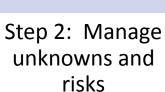

RoadMAP

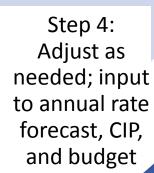

(Monitoring and Assessment Plan)

Step 3: Report to Board annually and as needed

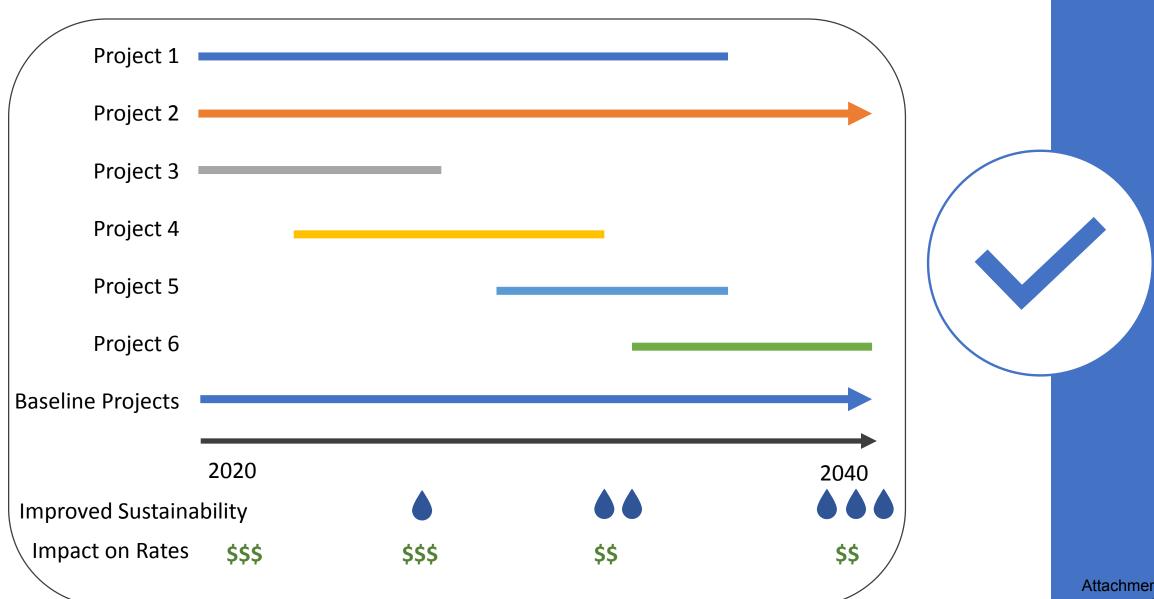

Step 1: Develop Implementation Schedule

Step 2: Manage Unknowns and Risks

Monitoring Category	Example Metrics
Demands	Water useConservation savingsRisks and opportunities
Existing Supplies	 Local surface water availability Imported water availability Recycled water use Risks and opportunities
Ongoing Projects	 Scope Schedule Budget Risks and opportunities
Alternative Projects	StatusRisks and opportunities
Policies and Regulations	Impact to water supply reliability/level of serviceRisks and opportunities

Step 3: Report to the Board

Suggested Master Plan Projects

- No Regrets Conservation and Stormwater
- Potable Reuse
- South County Recharge***
- WaterFix (State Side)
- WaterFix (Federal Side)
- Pacheco Reservoir
- Transfer-Bethany Pipeline

Alternative or Additive Projects (Partial List)

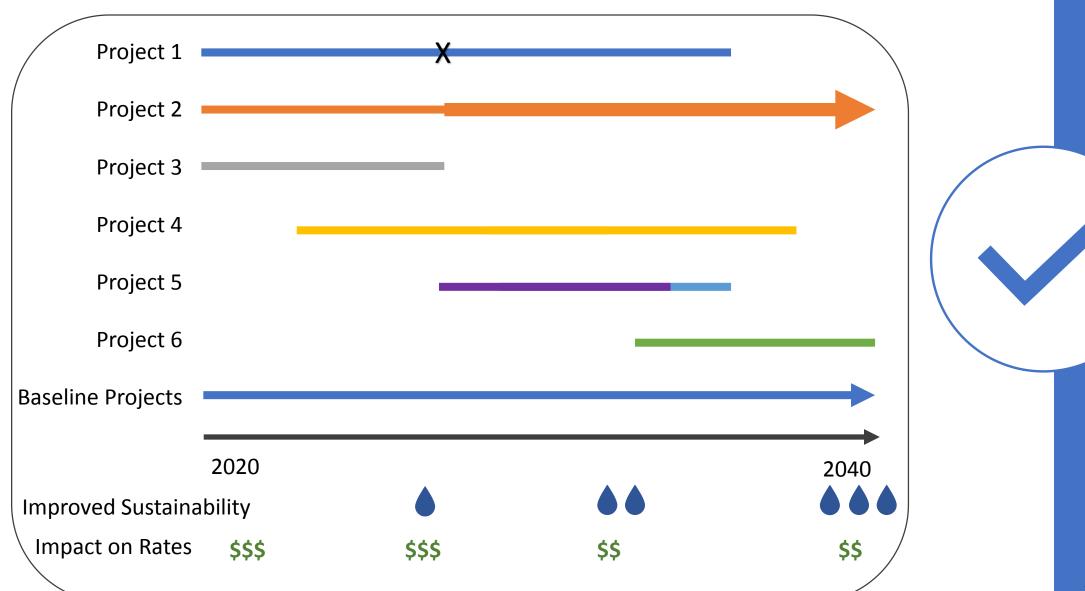

- Sites Reservoir
- Refinery Recycled Water Exchange
- Los Vaqueros Reservoir
- Countywide Water Reuse Master Plan
- California WaterFix Long-Term Transfers
- Bay Area Brackish Water Treatment
- Lexington Pipeline
- North County Recharge
- Groundwater Banking
- South County Water Treatment Plant
- Morgan Hill Recycled Water

Considerations for Moving Projects

- Change in level of service
- Cost and rate impacts
- Change in risk level
- Relationships between projects
- Needs and opportunities
- Stakeholder input

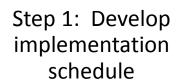

Step 4: Adjust as Needed

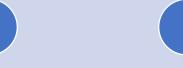

RoadMAP

(Monitoring and Assessment Plan)

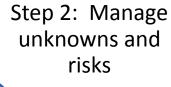

Step 3: Report to Board annually and as needed

Step 4:
Adjust as
needed; input
to annual rate
forecast, CIP,
and budget

Next Steps

- Prepare Draft Water Supply Master Plan 2040 March 2019
- Solicit input on draft Water Supply Master Plan
 March April 2019
- Present Final Water Supply Master Plan June 2019

Recommendations

- Reaffirm the 2012 "Ensure Sustainability" Strategy
- Approve changing the water supply reliability level of service goal from meeting 90 percent of normal year demands in drought years to meeting 80 percent of demands in drought years
- Provide direction on the monitoring and assessment plan (MAP)
- Direct staff to return with updates on projects with near-term decisions points
