Subject: Year 7 Safe Clean Water report, Sept 22 meeting

Good Morning Meenakshi, Nai and Gary,

I will be speaking at tomorrow night's Board meeting on the Year 7 Safe Clean Water report. Although there are many highlights, these are the concerns/recommendations I have:

1. I recommend the IMC's annual letter to the board with staff response be included in this and all subsequent annual reports.
2. I would like to understand why an IMC meeting on the SCW Renewal proposal was not scheduled between the draft release date and board approval date. The lead time for a committee chair to call an emergency meeting is 4-5 weeks. Can this be shortened?
3. Despite IMC's concern about lack of funding in Priority D, Year 7 report shows a \$19M reduction in non-mitigation programs. I'd like to know more about this change.
4. Several flood projects have been delayed.

I look forward to the IMC's deep dive into the details of the program. I really enjoy learning about these complex projects.

Thank you,
Kit
