Dear Valley Water Staff and Directors,

There's still some ambiguity about the Pacheco Reservoir project regarding water supply reliability vs. new emergency water supply. It would be appreciated if the following text was updated to clearly communicate the water supply benefits of this project.

1. In the timeline on page 17 of Supplemental Attachment 2, the entry for 2019 says "The project would expand Pacheco Reservoir's storage capacity to provide for increased emergency water supplies ..." This was the proposal at the time but it has changed. We

suggest a sentence be added to explain this development.

2. Under Significant Business Challenges/Opportunities on page 164 of Supplemental Attachment 2, the text also describes "increasing emergency water supplies." We suggest this be updated to use the reliability language used elsewhere to describe the project.

Thank you for your consideration.
