RE: Valley Water's Draft Fiscal Years 2022-2026 Capital Improvement Program

Dear Mr. Callender,

Thank you for providing a copy of Santa Clara Valley Water District's Draft Fiscal Years 2022-2026 Capital Improvement Program to the City of Saratoga.

In reviewing the District's FY2022-26 CIP, City staff determined that it appears to be consistent with the City's General Plan and there are no objections to the proposed CIP. Please contact me at dpedro@saratoga.ca.us or (408) 868-1231 if there are any questions regarding this letter.

Sincerely,

Debbie Pedro, AICP
Community Development Director

Hello Jacinta Bettencourt,

Thank you for the notification about Valley Water's 2022-2026 Capital Improvement Plan. The plan does not conflict with Monte Sereno's General Plan.

This memo is to certify The City of Monte Sereno has no objections or comments to Valley Water's Draft CIP for FY 2022-2026. All the projects are outside of the city limits for the City of Monte Sereno.

Regards,

Steven Leonardis
City of Monte Sereno

SANTA CLARA VALLEY WATER DISTRICT (VALLEY WATER) DRAFT FISCAL
YEARS 2022-26 CAPITAL IMPROVEMENT PROGRAM (CIP)

Dear Mr. Callendar:

Thank you for the opportunity to review Valley Water's draft Fiscal Year 2022-26 CIP, which appears to be consistent with the Mountain View 2030 General Plan. There are no objections to the Valley Water's CIP at this time.

The City of Mountain View supports proposed capital expenditures in infrastructure, security, reliability, and technology to ensure a safe, adequate, and uninterrupted delivery of water to our City. We look forward to continuing to work with Valley Water for the completion of Valley Water's Permanente Creek Protection Project, the San Francisco Bay Shoreline Projects, and other projects.

The City of Mountain View welcomes future opportunities to review and comment on upcoming CIPs and project-specific issues. Please contact Ed Arango, Assistant Public Works Director, at 650-903-6542 if there are any questions regarding this letter.

Sincerely,

Dawn S Cameron

Subject: Review of Santa Clara Valley Water District's Draft FY 2022-26 Capital Improvement Program

Dear Mr. McMahon:

Thank you for the opportunity to review the Santa Clara Valley Water District draft 2022-2026 Capital Improvement Program. After reviewing the CIP, we have determined that the capital projects affecting Cupertino are consistent with the City of Cupertino's General Plan.

We have reviewed the document for all CIP projects within the Cupertino jurisdiction and those outside of the City that are expected to have significant effects. The projects are:

- | | |
|---|-------------|
| 1) Dam Seismic Stability Evaluations | Page II-19 |
| 2) 10-Year Pipeline Inspection & Rehabilitation | Page II-25 |
| 3) Distribution System Implementation Project | Page II-29 |
| 4) IRP2 Additional Line Valves | Page II-33 |
| 5) Treated Water Isolation Valves | Page II-45 |
| 6) Vasona Pump Station Upgrade | Page II-47 |
| 7) Rinconada Water Treatment Plant (RWTP) Residuals Remediation | Page II-53 |
| 8) RWTP Reliability Improvement | Page II-55 |
| 9) RWTP Treated Water Valves Upgrade | Page II-57 |
| 10) WTP Implementation Project | Page II-65 |
| 11) Sunnyvale East and West Channels | Page III-11 |
| 12) Stevens Creek Fish Passage Enhancements | Page IV-5 |
| 13) Watershed Habitat Enhancements | Page IV-21 |

SCVWD

April 2, 2021

Page 2

Projects 1 through 10 are focused on the maintenance, quality, and reliability of the water supply and transmission systems in the Cupertino area. There are no general plan inconsistencies with these items.

Project 11 listed above is described as flood protection and erosion and sedimentation repair project. The City of Cupertino requests that it be notified of any modifications to plan or scope of this project.

Projects 12 and 13 listed above will work to enhance wildlife and natural habitat along Stevens Creek and are consistent with the general plan.

The City has several storm drain outfalls that feed into District maintained creeks, and the City would like to request that the District, as it inspects its facilities, document and notify the City of any outfalls in need of repair. The City would like to further work together with the District on repairs as you plan for maintenance operations in these areas.

The City appreciates the District's ongoing support of various projects, including the recently approved Regnant Creek Trail project. We look forward to continuing that collaboration.

Thank you for the opportunity to review the CIP and we look forward to reviewing and commenting on the projects during the design development process. Please feel free to contact me if you have questions or comments.

Sincerely,

Roger Lee
Director of Public Works
City of Cupertino

Subject: Santa Clara Valley Water District Capital Improvement Program

Dear Mr. ^{Rick}Callender:

Thank you for your staff's recent presentation of the FY2022-26 Santa Clara Valley Water District (Valley Water) Capital Improvement Program (CIP) to the representatives of our Public Works Department. I appreciate your effort to keep City staff informed of Valley Water's proposed flood management projects in our community. The exchange of information will promote better coordination between Valley Water's projects and both private land development projects in Palo Alto and the City's own capital improvement projects.

Palo Alto supports the following flood management and water supply projects located within the City's jurisdiction and discussed at the meeting:

- Palo Alto Flood Basin Tide Gate Structure Improvements
- San Francisquito Creek (San Francisco Bay through Searsville Dam)
- Expedited Purified Water Program
- San Francisco Bay Shoreline Flood Protection
- Watersheds Asset Rehabilitation Program

City staff is aware of and supportive of these projects, which will ultimately provide our residents and businesses with increased flood protection, relief from mandatory flood insurance and provide an alternative water supply in the County. With respect to Valley Water's CIP, the City submits the following comments:

CityOfPaloAlto.org

Printed with soy-based inks on 100% recycled paper processed without chlorine.

Santa Clara Valley Water District Capital Improvement Program

1. Palo Alto Flood Basin Structure Improvements: Per the discussion at our CIP review meeting with Valley Water staff, it will be important to continue to coordinate with City staff and local stakeholders during the planning, design and throughout the construction process to ensure that local concerns are addressed.
2. San Francisquito Creek (San Francisco Bay through Searsville Dam): We very much appreciate Valley Water's active role in the planning and design of improvements for the upstream of Highway 101 projects. The active participation by Valley Water staff and the significant level of funding provided by Valley Water have been instrumental in moving these projects forward. These projects will provide tangible flood protection benefits to Palo Alto residents and businesses in the near term.
3. San Francisco Bay Shoreline: We appreciate that the FY2022-2026 CIP budget includes funding (including supplemental funding from State of California grant funds) for the planning of potential shoreline improvements in the northern portion of the county, including Palo Alto, Environmental Impact Areas 1 - 3. Since 2019 Palo Alto has been assisting Valley Water with the Shoreline Feasibility Study Phase II by providing documents and background, we will continue to assist Valley Water with information as needed.
4. Expedite Purified Water Program: City staff will continue to collaborate with Valley Water to support the Expedite Purified Water Program as per the 2019 Partnership Agreement to Advance Resilient Water Reuse Programs in Santa Clara County between Valley Water and the Cities of Palo Alto and Mountain View.
5. Watersheds Asset Rehabilitation Program: We recognize the mutual benefits of the Watershed Asset Rehabilitation Program to repair levees and stream bank sites. We support Valley Water's effort to reduce flooding risks and/or damage to adjacent properties and facilities.

Staff has reviewed Valley Water's proposed CIP for consistency with the City of Palo Alto Comprehensive Plan 2030 and the Sustainability Climate Action Plan. The following policies and programs were recognized that relate to the implementation of the CIP:

- Policy N-3.4: Recognize that riparian corridors are valued environmental resources whose integrity provides vital habitat for fish, birds, plants and other wildlife and carefully monitor and preserve these corridors.
- Policy N-3.5: Preserve the ecological value of creek corridors by preserving native plants and replacing invasive, non-native plants with native plants.
- Policy N-3.7: Avoid fencing, piping, and channelization of creeks when flood control and public safety can be achieved through measures that preserve the natural environment and habitat of the creek.

Santa Clara Valley Water District Capital Improvement Program

- Policy N-3.8: Work with the Santa Clara Valley Water District, San Francisquito Creek Joint Powers Authority and other relevant regional and non-governmental agencies to enhance riparian corridors, provide compatible low-impact recreation and ensure adequate flood control.
- Program N-4.7.1: Support and participate in the work of the Santa Clara Valley Water District to prepare a high-quality groundwater management plan that will address groundwater supply and quality, including opportunities to recharge groundwater, including through use of recycled water and extracted groundwater.
- Program S2.8.3: Collaborate with the San Francisquito Creek Joint Powers Authority and the Santa Clara Valley Water District on environmentally sensitive efforts to stabilize, restore, maintain and provide one percent (100-year) flood protection adjacent to San Francisquito Creek.
- Program S2.12.1 Work cooperatively with the Santa Clara Valley Water District and the San Francisquito Creek Joint Powers Authority to provide flood protection from high tide events on San Francisco Bay, taking into account the impacts of future sea level rise, to provide one percent (100-year) flood protection from tidal flooding, while being sensitive to preserving and protecting the natural environment.

Staff compared the scope of Valley Water's proposed flood management projects with these policies and has determined that the CIP appears to be consistent with the current Comprehensive Plan.

The City of Palo Alto appreciates the opportunity to review the FY2022-2026 CIP and welcomes the chance to review and comment on future CIPs. Looking ahead to next year, please coordinate the review of your draft CIP directly with the Chief Planning Official by calling Planning Division support staff at (650) 329-2404. Thank you again for your continued efforts to maintain effective communications between the City and Valley Water.

Sincerely,

Ed Shikada
City Manager

Re: Conformance of SCVWD CIP 2022-26 with the City of Campbell General Plan

Dear Mr. McMahon:

This letter serves as confirmation that both the Community Development and Public Works Departments of the City of Campbell have reviewed the Santa Clara Valley Water District's Capital Improvement Program 2022 – 26 and find it consistent with the City of Campbell's General Plan.

If you have any additional questions, I can be reached at (408) 866-2150.

Sincerely,

Todd Capurso
Public Works Director
