### **2. Scope of Services**

- A. Schedule P, Scope of Services, describes the professional planning services to be performed by Consultant for Valley Water's Purified Water Program - Preliminary Geotechnical Pipeline Alignment Project (Project). Valley Water may, at its discretion, choose to negotiate an amendment to this Agreement with Consultant for construction phase services. Valley Water may, at its discretion, choose to initiate a new consultant agreement selection process for services for any subsequent phase(s) and/or utilize Valley Water staff to perform such services.

### **3. Project Objectives**

- A. The objectives of the Project include:
  - 1. Evaluating soil conditions; performing geotechnical engineering investigations; and preparing a Geotechnical Data Report as a reference document for future pipeline placement along the alignments specified in Scope of Services. The scope includes the pipeline alignments conveying purified water from a future advanced water purification facility (AWPF) in San Jose to the Los Gatos Recharge System (LGRS), or from an AWPF in Palo Alto to the LGRS.

### **4. Project Background**

- A. Valley Water manages an integrated water resources system that includes the supply of clean safe water, flood protection, and stewardship of streams on behalf of Santa Clara County's two million residents and businesses. Valley Water effectively manages 10 (ten) dams and surface water reservoirs, 3 (three) drinking water treatments plants, one (1) purified water treatment plant, nearly 400 (four hundred) acres of groundwater recharge ponds and more than 275 (two hundred seventy-five) miles of streams.
- B. Valley Water's Board of Directors established a goal to increase recycled water use, such that reuse supplies meet 10 percent of total Countywide demands by 2025 and up to 24,000 acre-feet per year (AFY) by 2040. In order to meet this goal, Valley Water will build AWPFs that will use advanced treatment processes to treat the final effluent from the wastewater treatment facilities of partner agencies.
- C. Valley Water is currently evaluating the feasibility of constructing an AWPF either in the City of Palo Alto or in the City of San Jose. The first AWPF location is just south of the existing Palo Alto Regional Water Quality Control Plant, and the second location is adjacent to the Silicon Valley Advanced Water Purification Center (in San Jose). Ultimately, the selected AWPF will convey purified water from one of these locations to the LGRS. The proposed pipeline routes were developed as part of the Countywide Water Reuse Master Plan (CoRe Plan) for several reuse portfolios.

## SCHEDULE P SCOPE OF SERVICES

- D. The work completed in this Agreement will result in valuable preliminary planning information that will be available in the Purified Water Program Request for Proposal process.
